**FIXED: THE SCIENCE/FICTION OF HUMAN ENHANCEMENT (USA)**

From bionic limbs and neural implants to prenatal screening, researchers around the world are hard at work developing a myriad of technologies to fix or enhance the human body. Through the perspectives of five people with disabilities—a scientist, journalist, community organizer, bionics engineer, and exoskeleton test pilot—*FIXED* takes a close look at the drive to be "better than human" and the radical technological innovations that may take us there. Directed by Regan Brashear. 4:00pm *FILMMAKERS PRESENT*

### **THE MARCH OF THE BONUS ARMY (USA)**

Impoverished by the Great Depression, 45,000 WWI veterans hoped their country would help them in their time of need, just as they had helped their country. *The March of the Bonus Army* tells the dramatic story of these veterans and their epic journey initiated a string of events that influenced the rights of veterans and the rights of citizens to assemble and petition the government; it was one of the first instances of large scale racial integration in the fight for social justice. Directed by Robert Uth. 8:30pm

### **CITIZEN KOCH (USA)**

Using recent events in Wisconsin as its primary focus, *Citizen Koch* truly "follows the money." We begin to see how the fragments and noise coalesce around a handful of very rich, very powerful individuals who have a specific vision of our country and are willing to pay any price to cultivate their ideas. Conservative, liberal, or just plain sick-of-it-all, this film will open the eyes and raise the blood pressure of every citizen concerned about how muted their voices may become if only the rich and powerful have a voice. Directed by Carl Deal and Tia Lessin. 9:10pm
