

UNITED NATIONS ASSOCIATION FILM FESTIVAL

7th Traveling Film Festival

11 and 12 May 2014

Columbia Global Centers | Europe The American University of Paris

Seven award-winning documentary films will be screened that together form a curated whole: "We the People," vision 1, documents the socio-economic class divisions, and their consequences, even in a nation that proclaims "liberty and justice for all." "Public Citizens" focuses on a number of Americans who take their political, ethical, sexual, and ideological battles public: Gore Vidal, William Buckley, Norman Mailer, the Koch brothers, Eleanor Roosevelt. "We the People," vision 2, celebrates social activism among Americans who recognize that in our world the stakes are high and know no distinction of social or economic class, race, ethnicity, or geography. Even for the "fittest," the stakes are united. Division is a luxury we can no longer afford.
