PRESENTATION

‘Collective creativity’ is a concept launched by IN magazine, Milan 1972, and diffused from California by Jim Burns’ homonymous book published in 1974. It signals the new electronic era of widespread interactivity and social media, where anybody can create and share messages and receive feedback, able to influence large masses of people.

The enormous energy arising from the opportunities that the employment of digital tools creates causes important repercussions in society, orienting political and social-economic trends. In other words: people have a voice and are no longer totally subject to the establishment.

This identifies new active roles for individuals and communities, increasing democracy and other assets of institutional power; so these are no longer reserved to elites but open to the new movements that express priorities and needs arising from the bottom. These are the roots of the new digital era, where nobody must be left behind.

The Infopoverty World Conference organized by OCCAM, with the patronage of the European Parliament Information Office in Milan, has since 2001, following the proclamation of the Millennium Development Goals, focused yearly at the United Nations Headquarters in New York on innovative solutions and best practices, elaborated, together with the United Nations system, governments and the civil society, to empower the fight against poverty.

The Conference represents, for its continuity, operational capability and strong interoperability with the UN system, a unique global forum, gathering together leading experts, academics, opinion leaders, managers, government officials, and philanthropists.

It has given rise to the Infopoverty Programme, which promotes and realizes actions on the ground using ICTs as tools of development, creating the UN Millennium Village in Sambaina (Madagascar) and ICT Villages in Honduras, South Lebanon, Navajo Nation, Lesotho and Ethiopia.

The previous editions of our conference, collected in the e-book “17 Years of Infopoverty World Conference: the digital revolution in the words of the protagonists (2001-2017)”, generated the launching of new concrete approaches for the achievement of the SDGs: such as the global platform, led by the World Food Security E-Center, to provide e-services on Food Security, e-health, distance learning and training, directly to communities in need, and sustaining several local projects in Tunisia, Malawi, Mozambique, Sierra Leone, Suriname, Vanuatu, Zambia, Madagascar, Niger, in the ambit of the Global Alliance.

UNDER THE PATRONAGE

INFOPOVERTY NETWORK:

MEDIA PARTNER:

1:15pm - 2:15pm - Special Event

8th SIGNS OF CHANGE / 14th UNAFF TRAVELING FILM FESTIVAL, promoted by UNAFF, OCCAM and IFTC-UNESCO

will present three short movies on the themes of Infopoverty moderated by Jasmima Bojic, Founder and Director of UNAFF (United Nations Association Film Festival). www.unaff.org

- The other side, by Griselda San Martin (6 min) Mexico/Spain/USA

Just like every other weekend at Friendship Park, dozens of people have come to meet and greet one another on both sides of the US-Mexico border fence. Among those present is Josè Marquez, who has come to see his daughter Susanna.

- Without Country, by Theo Rigby (21 min) Guatemala/USA

“Undocumented immigrant” and “US citizen” are often polarizing phrases that carry a charged set of assumptions and stereotypes. Sam and Ella Meikl, and their son Gilbert, left Guatemala during a violent civil war and moved to California. They had two more children, Helen and Dulce, who are both US citizens.

- Through my eyes: Hani’s journey, by Zahra Mackaou (30 min) Canada/Lebanon/Syria

It follows the journey of blind Syrian refugee Hani Al Moliya from the camps in Lebanon to Canada. Told through his photos, it is a story of triumph against adversity, set against the backdrop of the Syria crisis.

2:30-4:00 pm – Third Session

TOWARDS THE DIGITAL ERA

Worldwide the digital natives are changing our way of life, and are building new paradigms of the new incumbent digital society to fight poverty successfully is necessary to give immediately room and to sustain the new visions emerging from deep Africa, Latin American, Asia and Oceania young natives which are facing with the real need of their communities and are able to use in a creative and constructive way the m-devices as means of job creation and fill the gap, having full connectivity all over the world. The primary need is to create new digital institutions able to receive and support this incumbent instance as a great opportunity to achieve SDGs.
