DEATH BY DESIGN:

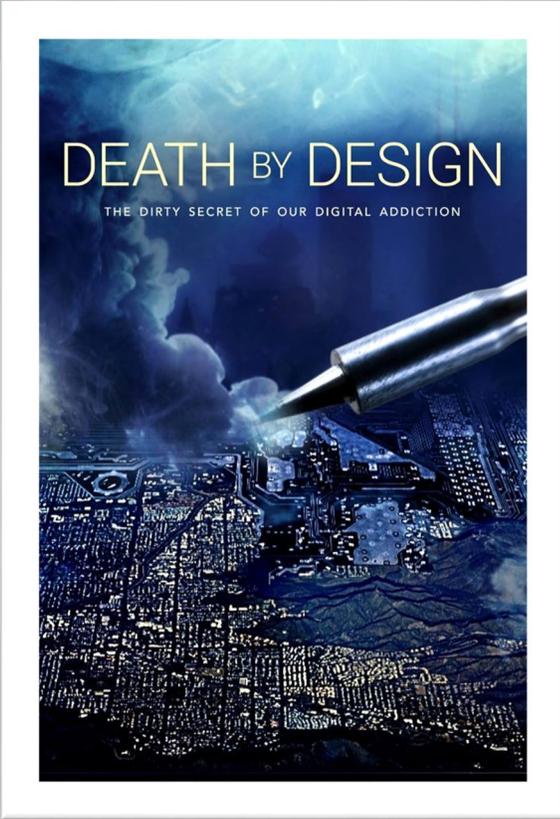

THE DIRTY SECRET OF OUR DIGITAL ADDICTION

(73 min)

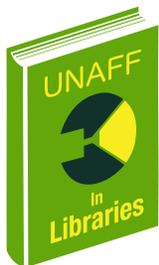

Director: Sue Williams

Whether a smartphone, tablet or laptop, people love their electronic devices. The numbers prove it – by 2020, five billion people will own a mobile phone, four billion will have a personal computer. Consumers are always hungry for the latest models that promise more than before, but there’s a dirty secret to this digital addiction.

In **DEATH BY DESIGN**, filmmaker Sue Williams investigates the underbelly of the electronics industry and reveals how even the smallest devices have deadly environmental and health costs.

APRIL 24
7:00 PM
HONORING
EARTH DAY
